Wire Management Reels

- Material : Painted steels for bodies ; special steels for wheels, bearings are made in Japan.
- **Applications of patented Wire Management Reels :**
- Installing a new packaged roll of cable on the supporting wheel is easy only few seconds.
- It's very easy to see the rest details of cable clearly from outside.
- In order to fit the different brands of wire packaging rolls, the diameters can be changed by adjusting the positions for the supporting metal bar.
- For convenience sake, RH-500 & RH-600 Types can be installed on 4 wheels to get the fast moving ability by option.
- For pulling wire speed, there is an adjustable brake part on the axle of Wire Management Reels.
- For saving working time, allowing several cables to be pulled through in multi Management Reels side by side.
- For saving workers, there is no need 2 workers anymore to pull wires and manage wires at the same time in traditional way.
- For saving wires, there are no mass twisted wires to be thrown away happens, the wires are always arranged neatly by Wire Management Reels.
- The Wire Management Reels are worth your investment for a very long-term future service.

Cat. No.	Wheel Sizes			Body Sizes			Approx. Wire Size	Std. Pkg. pcs
	Steel Wheel Diameter D mm	Wire Packaging Diameter (Adjustable) Min. ~ Max. mm	Axle Width mm	L mm	W mm	H mm		
RH - 300	300	130 ~ 200	70	338	127	360	under 5.5mm ²	1
RH - 400	400	130 ~ 240	90	435	147	445	under 8.0mm ²	
RH - 500	500	140 ~ 270	150	540	240	618	under 38 mm ²	
RH - 600	600	140 ~ 290	150	648	241	760	under 80 mm ²
